

LA BOITE
CONCEPT

LD 120

LD 120

FUNCTION

The LD 120 (Laptop Dock) is a high quality all-in-one acoustic speaker designed for computers and wireless devices.

DESCRIPTION - HOW TO USE

This universal speaker enables the convergence of traditional Hi-Fi and new digital medias. One plug is all you need to connect the LD and enjoy high quality, immersive, and powerful sound reproduction thanks to La Boite concept's Wide Sound patented system loudspeakers.

R&D

The LD 120 was the first product in the LD range. Yvon Maurel, an acoustic engineer PhD and La Boite concept's Technical Director, developed special loudspeakers for this project. This speaker is the result of 2 years of R&D during which each technical element was designed exclusively for this model.

DESIGN

Timothée Cagniard, co-founder of La Boite concept, with the help of Thierry Cagniard, designed the LD 120. Timothée used all the family's knowledge of traditional Hi-Fi together with his observation of how it is used today in order to anticipate the needs of tomorrow.

TECHNICAL DESCRIPTION

The LD 120 is a top quality coherent system, developed in-house from A to Z without any compromises to get the best possible alliance of acoustics and electronics.

Simply place your computer on its leather surface and enjoy high definition music. The LD 120 has an integral USB converter (Atoll 24 bit DAC) which acts as an external sound card so you are no longer dependant on your computer's quality. You can also connect your wireless devices (tablets, smartphones...) to the LD thanks to the latest Bluetooth® technology (4.0, apt-X codec).

TECHNICAL DATASHEET

Description : Active speaker with an Atoll Burr-Brown® DAC (24 bits) input, with Mini-Jack, RCA inputs.

HD Wireless Music Kit: Bluetooth® 4.0 apt-X.

18cm trapdoor with a 220v Power Socket

Power : 120 watts RMS 8 ohms (class AB, 2x25 watts + 1x70 watts)

Components : Exclusive La Boite concept speakers.

- 2 x 2.5cm silk dome tweeters

- 2 x 10cm aluminium mid-range with cellulose pulp cone

- 2 x 8cm full range, Wide Sound patented rear system

- 1 x 16cm aluminium woofer with cellulose pulp cone

Dimensions : h x w x d: 77 x 57 x 52cm

FINISHES

Matte lacquered wooden cabinet, genuine black leather blotter.

Legs are available in: glossy lacquered black, white, red and grey, matt black, lacquered cherry wood (guitar-like), matte walnut, solid matte opened walnut and solid oak.
